S.O.C.

DETAILED ACTION

Applicant's election with traverse of species C in the reply filed on 3/22/05 is acknowledged. The traversal is on the ground(s) that the independent patentably distinct species are related under a particular disclosure. This is not found persuasive because the applicant did not submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case

The requirement is still deemed proper and is therefore made FINAL.

Claims 6, 8-12, and 17-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 3/22/05.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7, 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Ralston.

Ralston disclose an inlet door assembly in which the door assembly has many positions (since it is rotated, the door has thousands of positions), actuators coupled to the door, ducts

having sidewalls, the door has first and second sides, and arms having first and second ends that are connected to the sidewalls and the door. See figures.

Allowable Subject Matter

Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hirtsiefer, Brumby et al, Swanger, and Wegefelt disclose closure means.
